

Mini Plug-In Outlet with Wi-Fi Technology

decora smart™

WORKS WITH IFTTT (IF THIS THEN THAT)

Use the free IFTTT service to connect your My Leviton devices with other Internet Of Things (IoT) enabled devices & services to create a smarter home automation experience.

AMAZON ALEXA VOICE CONTROL

Compatible with Alexa so that you can turn on & off your connected devices with your voice. “Alexa, turn on the living room lamp.”

GOOGLE ASSISTANT VOICE CONTROL

Works with the Google Assistant. “Ok Google, turn [My Leviton device name] On”.

APPLICATIONS

Connect your plug-in lamps, holiday lighting, and small appliances. Create schedules around your lifestyle, control from anywhere with the My Leviton app, or use your voice to turn on and off. The new mini design allows for two plug-in outlets to be plugged into a single receptacle – ideal for controlling multiple devices in an area like living rooms, bedrooms, and kitchens. As well, the integrated button provides manual push-button on/off control at any time.

Installation is simple and requires no new wiring – just plug in your device. Simplify control of the residence - schedule lamps and connected loads to turn on/off at specific times or based on sunrise/sunset, easily group smart devices into rooms, and create scenes to activate multiple loads at once. Utilize the auto-shutoff feature as a countdown timer in closets, hallways and bathrooms. Engage home vs. away to enact randomization of lighting control, providing a lived-in appearance.

Ideal for any residential setting where remote ON/OFF switching of appliances, motor loads up to 3/4 HP, or freestanding lights, including LED, Incandescent, Magnetic, or Compact Fluorescent loads is needed. Typical applications include switching of lamps, portable fans, kitchen appliances, indoor fountains, holiday lighting, and more.

BENEFITS

- Control lights and plug loads from anywhere using the free My Leviton app for iOS and Android, no hub required.
- Amazon Alexa products provide voice control: “Alexa, turn on living room lights”.
- Works with Google Assistant including Google Home for voice control. “Ok Google, turn [Google room name] On”.
- Integrate with IFTTT for additional third-party functionality
- Simplify control of your home – schedule lights and connected loads to turn on/off at specific times or based on sunrise/sunset, easily group your smart devices into rooms, and create scenes to activate multiple lights at once.
